

SAFETY ALERT BULLETIN

MACHINERY ACCIDENT

On Friday June 23, 2006, at approximately 5:30 AM, a serious personal injury occurred while two repairmen were changing the right front tire on a Joy 21 Shuttle Car. The two repairmen were attempting to jack the car higher for more clearance in order to install a new tire. The shuttle car slid backward off the hydraulic jack and caught one of the repairmen's left leg between the shuttle car and the mine floor. The accident caused a broken leg and knee injuries.

RECOMMENDATIONS:

- "All equipment raised for repairs or other work shall be securely blocked prior to persons positioning themselves where the falling of such equipment could create a hazardous condition."
